

NewYorkBIO

2023 Fellows Program

ABOUT US

NewYorkBIO supports the development and growth of New York State's life science industry, and serves its members and the life science community by providing a network for public policy, industry advocacy, and community development.

ABOUT THE FELLOWS PROGRAM

The Fellows Program offers companies the opportunity to access NewYorkBIO's extensive services, benefits, and network to help them grow. The program offers a three-year membership providing early-stage life science, biotech, and medtech companies full access to the complete NewYorkBIO portfolio of benefits, including the NewYorkBIO purchasing consortium and discounted access to seminars, conferences, and networking events.

MINI PITCH DAYS

NewYorkBIO provides two virtual pitch-days a year. Fellows have the opportunity for their companies to be seen by a group of industry leaders to receive expertise feedback and guidance.

EXCLUSIVE NETWORKING EVENTS

In addition to NewYorkBIO's programming, the Fellows Program provides the opportunity to attend special events planned just for them. This includes networking events where founders can connect over shared experiences and share advice with one another.

SAVINGS ENROLLMENT

NewYorkBIO offers its members the opportunity to take advantage of several of the BIO Business Solutions® programs. Upon enrolling, Fellows are required to choose two savings partners that they would like to utilize during their fellowship to ensure they are fully leveraging NewYorkBIO's resources.

FEE STRUCTURE

The program is a three-year dedication where we work towards enabling your success as a company in our ecosystem.. The first year of membership is free, the second year costs \$350 for 12 months of membership and the graduating year is \$650.

WHO CAN APPLY

Early stage life science companies founded in the last five years that are actively raising capital.

HOW TO APPLY

Life science entrepreneurs who are interested in the program must complete the application online once it is released in January 2023. Applicants will be contacted for a preliminary conversation. Upon acceptance, Fellows will receive a one year free membership, followed by two years of discounted membership.
